DID YOU KNOW?

Blight is a common and devastating disease in the vegetable garden, caused by a fungus (*Phytophthora infestans*). It spreads in particular during summers with heavy rainfall and temperatures between 10 and 25°C.

WHAT ARE THE SOLUTIONS?*

Some treatments are available, but the risk of attack can be reduced by using resistant varieties and adopting several measures:

- Use healthy seeds or plants.
- Avoid proximity to a potato crop, as well as petunias and flowering tobacco, which are potential hosts of *Phytophthora infestans*.
- Aerate your greenhouse crops as much as possible to avoid high humidity rates.
- Water the base of your plants rather than the foliage.
- Eliminate affected leaves as you spot them and take them out of the garden to avoid contaminating healthy plants.

* This variety is in the process of being registered.

GENERAL INFORMATION

The descriptions, illustrations, photographs, advice, suggestions and vegetation cycles that may be presented herein are aimed at experienced professionals and are derived from observations made in defined conditions on various trials. They are offered in all good faith, for purely informational purposes, and shall not therefore, under any circumstances, be held to be exhaustive, be taken as any form of guarantee of harvest or performance, prejudice specific factors or circumstances (either current or future), and more generally, form any kind of contractual undertaking whatsoever. The user must first and foremost ensure that his exploitation conditions, local geographical conditions, his planned growing period, his soil, the means at his disposal (such as technical knowledge and experience and cultural techniques and operations), his resources (such as tests and control methods) and his equipment, and more generally his agronomical, climatic, sanitary, environmental and economic context are suitable for the crops, techniques and varieties that are presented herein (see also our Terms and Conditions of Sale where applicable). All the varieties illustrated in this publication were photographed in favourable conditions and no guarantee can be provided that results will be identical under different conditions. All reproductions, whether in part or in whole, of this publication (of the medium and/or the contents), in any form whatsoever, are strictly forbidden, unless specific prior permission is granted.

IMPORTANT NOTICE: All intellectual property rights reserved. Illegal reproduction and/or exploitation is forbidden. Violation of these rights may constitute a serious offence that is prosecutable by Law.
