GENERAL INFORMATION: The descriptions, illustrations, photographs, advice, suggestions and vegetation cycles that may be presented herein are aimed at experienced professionals and are derived from observations made in defined conditions on various trials. They are offered in all good faith, for purely informational purposes, and shall not therefore, under any circumstances, be held to be exhaustive, be taken as any form of guarantee of harvest or performance, prejudge specific factors or circumstances (either current or future), and more generally, form any kind of contractual undertaking whatsoever. The user must first and foremost ensure that their exploitation conditions, local geographical conditions, their planned growing period, soil, the means at their disposal (such as technical knowledge and experience and cultural techniques and operations), their resources (such as tests and control methods) and equipment, and more generally their agronomical, climatic, sanitary, environmental and economic context are suitable for the crops, techniques and varieties that are presented herein (see also our Terms and Conditions of Sale where applicable).

The technical data and information on disease resistance provided are averages derived from observations made at various locations under different conditions, as well as from laboratory tests. They shall not be used as a forecast of future performance, but as a summary of past results. Seed performance, yields and crop results will vary depending on geographical areas, environmental conditions and pressures, farming and management practices, and the presence of pests or pathogens. New, unknown or atypical strains of pathogens may mitigate or overcome the resistance provided by the seed.

All the varieties illustrated in this publication were photographed in favourable conditions and no guarantee can be provided that results will be identical under different conditions.
