

ASTIA F1

The zucchini for your garden

- Upright, dark blue-green foliage, relatively disease-resistant
- Medium-length stems (18–20 cm) with a beautiful pure white color
- For fall and winter production
- Good frost tolerance

Typology

Green cylindrical squash

Number of seeds per gram

6-9

Sector

Young plant producers, Seed packet companies

Color

glossy dark green

Fruit shape

Cylindrical

Fruit size

Diameter : 4-8 cm

Length : 18-23 cm

Awards - Medals

RHS Award of Garden Merit

● Product cultivation

Disease resistance

IR: Px

Earliness

Yes

Sowing period

Mid-April to Mid-June

Planting period

Mid-May to Mid-July

Harvest

Mid-June to October

Cycle

Mid-early

● Additional information

Direct sowing in open ground (minimum surface soil temperature 14–16°C), in pots with subsequent transplanting, or directly into clumps or pots using a moist but not waterlogged growing medium. Germination temperature 23–25°C (2–3 days). Transplant when cotyledons are fully expanded. Minimum night temperature 14–15°C, minimum day temperature 16–20°C. Gradually ventilate the nursery to ensure the plants do not become leggy and to harden them off before planting (e.g., at the end of outdoor growing). Plant hardening-off period: 10–15 days depending on the season and root ball size. Using seedlings results in earlier fruiting.

IMPORTANT : The descriptions, illustrations, photographs, advice, suggestions and vegetation cycles that may be presented herein are aimed at home gardeners exclusively and are derived from observations made in defined conditions on various trials. They are offered in all good faith, for purely informational purposes, and shall not therefore, under any circumstances, be held to be exhaustive, be taken as any form of guarantee of harvest or performance, prejudge specific factors or circumstances (either current or future), and more generally, form any kind of contractual undertaking whatsoever. The user must first and foremost ensure that his exploitation conditions, local geographical conditions, his planned growing period, his soil, the means at his disposal, his resources and his equipment, and more generally his agronomical, climatic, sanitary and environmental context are suitable for the crops, techniques and varieties that are presented herein. All the varieties illustrated in this publication were photographed in favourable conditions and no guarantee can be provided that results will be identical under different conditions.
