Fruit weight
400-600 g

Product cultivation

Earliness
Yes

Sowing period
February to mid-June

Planting period
April to late July

Harvest
June to September

Additional information

Open ground direct sowing (minimum surface soil temperature 14-16°C), in seed trays with transplanting or directly in soil blocks: Germination temperature 18-20°C (4-5 days). 5 to 10 days after sprouting, gradually aerate the nursery to harden the seedlings off before planting (e.g. by finishing growing them outdoors).

IMPORTANT : The descriptions, illustrations, photographs, advice, suggestions and vegetation cycles that may be presented herein are aimed at home gardeners exclusively and are derived from observations made in defined conditions on various trials. They are offered in all good faith, for purely informational purposes, and shall not therefore, under any circumstances, be held to be exhaustive, be taken as any form of guarantee of harvest or performance, prejudge specific factors or circumstances (either current or future), and more generally, form any kind of contractual undertaking whatsoever. The user must first and foremost ensure that his exploitation conditions, local geographical conditions, his planned growing period, his soil, the means at his disposal, his resources and his equipment, and more generally his agronomical, climatic, sanitary and environmental context are suitable for the crops, techniques and varieties that are presented herein. All the varieties illustrated in this publication were photographed in favourable conditions and no guarantee can be provided that results will be identical under different conditions.
