

BUFFALOSUN F1

Late Blight resistant variety, what a good news!

- Pineapple-type tomato
- Large, ribbed, bright yellow fruits with mottled flesh when ripe
- Very meaty with very few seeds and a distinctive sweetness
- Highly resistant to diseases, including tomato late blight
- High-yielding and easy to grow
- A colorful addition to our Buffalo series.

● Product cultivation

Disease resistance

HR: Fol:0,1,2(US1,2,3) ; Va:0(US1) ; Vd:0(US1) | IR: Pi ; TSWV:T

Phytophthora

Yes

Sowing period

Mid-January to April

Planting period

Starting in mid-March (in a cold frame), then in the ground after the last frosts until mid-June

 **Harvest**
June to October

 **Cycle**
Mid-early

● Additional information

Sow in seed trays or mini-pots; transplant into root balls or pots. Germination temperature: 25°C (5–6 days). Transplanting temperature: 18–20°C. Growing temperature: 16–17°C at night, 18–22°C during the day. Growing period: 45 to 60 days depending on the season, root ball size, and growth stage (ideally when the flower cluster is visible). Grafting is possible and even recommended for certain varieties to increase vigor and yield.
