**Fruit size**
Length : 60-70cm

**Fruit weight**
700-1100g

## Product cultivation

**Sowing period**
February to June

**Planting period**
April to August

**Harvest**
June to late November

**Cycle**
Medium-early

## Additional information

Sowing in warm conditions before the end of March to prevent bolting. Soil temperature 23-24°C until germination (8-10 days). Transplant in soil blocks 20-25 days after sowing, then grow at 17-20°C (day) and min 14-17°C (night). Harden the seedlings 10-15 days before planting by lowering the temperature (e.g. by finishing growing them outdoors). From transplanting to planting 25-30 days

**IMPORTANT** : The descriptions, illustrations, photographs, advice, suggestions and vegetation cycles that may be presented herein are aimed at home gardeners exclusively and are derived from observations made in defined conditions on various trials. They are offered in all good faith, for purely informational purposes, and shall not therefore, under any circumstances, be held to be exhaustive, be taken as any form of guarantee of harvest or performance, prejudge specific factors or circumstances (either current or future), and more generally, form any kind of contractual undertaking whatsoever. The user must first and foremost ensure that his exploitation conditions, local geographical conditions, his planned growing period, his soil, the means at his disposal, his resources and his equipment, and more generally his agronomical, climatic, sanitary and environmental context are suitable for the crops, techniques and varieties that are presented herein. All the varieties illustrated in this publication were photographed in favourable conditions and no guarantee can be provided that results will be identical under different conditions.
