ROCKKER F1

The Easy-to-Grow Little Prickly Plant

- Easy-to-grow short, spiny cucumber
- Naturally produces a large number of straight, firm, dark-colored fruits
- Good flavor, no bitterness
- Disease-resistant, particularly to powdery mildew (IR)

Typology

Short, Prickly Slicer Cucumber

Number of seeds per gram

40

Sector

Young plant producers

Color

Green

Fruit shape

Thorny court

Taste

Fruit size

Diameter : 3-4cm

Length : 20-22 cm

Fruit weight

200-300g

● Product cultivation

Disease resistance

HR: Ccu

IR: Co:1 ; Pcu ; Px ; CMV ; Psl

Earliness

Yes

Sowing period

March through Mid-July

Planting period

Starting in early April (in a cold frame), then in the ground after the last frosts until mid-August

Harvest

Late May through September

● Additional information

Sow in a tray or mini-clod in a moist but not waterlogged growing medium; transplant as a clod or into a pot. Germination temperature: 25–26°C (4–5 days). Transplant when the cotyledons are fully expanded at 20–22°C. Grow at a minimum of 16–17°C at night and 18–22°C during the day. Plant hardening-off period: 15 to 20 days, depending on the season and root ball size. Grafting is possible to increase vigor and yield.

IMPORTANT : The descriptions, illustrations, photographs, advice, suggestions and vegetation cycles that may be presented herein are aimed at home gardeners exclusively and are derived from observations made in defined conditions on various trials. They are offered in all good faith, for purely informational purposes, and shall not therefore, under any circumstances, be held to be exhaustive, be taken as any form of guarantee of harvest or performance, prejudge specific factors or circumstances (either current or future), and more generally, form any kind of contractual undertaking whatsoever. The user must first and foremost ensure that his exploitation conditions, local geographical conditions, his planned growing period, his soil, the means at his disposal, his resources and his equipment, and more generally his agronomical, climatic, sanitary and environmental context are suitable for the crops, techniques and varieties that are presented herein. All the varieties illustrated in this publication were photographed in favourable conditions and no guarantee can be provided that results will be identical under different conditions.
