Product cultivation

Disease resistance
IR: Pfs:0,1 ; CMV

Sowing period
August to October

Planting period
September to November

Harvest
October to February

Cycle
Medium-early

Additional information

Direct sowing in warm soil (min 8°C), sprouts in 5 to 10 days depending on the season. Soil block sowing: use 2-3 seeds, temperature 8-15°C. Grow at max 12-16°C, avoid extreme heat to prevent seedlings from getting leggy.

IMPORTANT : The descriptions, illustrations, photographs, advice, suggestions and vegetation cycles that may be presented herein are aimed at home gardeners exclusively and are derived from observations made in defined conditions on various trials. They are offered in all good faith, for purely informational purposes, and shall not therefore, under any circumstances, be held to be exhaustive, be taken as any form of guarantee of harvest or performance, prejudge specific factors or circumstances (either current or future), and more generally, form any kind of contractual undertaking whatsoever. The user must first and foremost ensure that his exploitation conditions, local geographical conditions, his planned growing period, his soil, the means at his disposal, his resources and his equipment, and more generally his agronomical, climatic, sanitary and environmental context are suitable for the crops, techniques and varieties that are presented herein. All the varieties illustrated in this publication were photographed in favourable conditions and no guarantee can be provided that results will be identical under different conditions. All reproductions, whether in part or in whole, of this publication (of the medium and/or the contents), in any form whatsoever, are strictly forbidden, unless specific prior permission is granted.
